Seventy-fourth Report of the Boston General Hospital.

The General Committee have pleasure in presenting the 74th Report on the activities of the Hospital during the year ended 31st December, 1947.

From the statistics on page 9 it will be seen that despite the limitations of staff and accommodation the services rendered to the sick and injured of the district are greater than ever before. Owing to the severe weather from January to March attendances in the Out-Patients Department were below the average, but the increased numbers made the congestion in the Department most acute during the rest of the year. The Committee have given serious consideration to possible ways of providing more space for the Out-Patients Department and although their efforts have the sympathetic support of the Ministry of Health, it is not easy to find a solution under the present building restrictions. The Committee, however, are exploring the possibility of obtaining and erecting temporary accommodation adjacent to the Department in order to in some measure reduce the difficulties under which the service is now administered. In an attempt to relieve congestion and to avoid long waiting at the Hospital an Appointments System is now functioning for a number of clinics.

There has been also an increase in the number of in-patient days treatment provided despite short periods of isolation when it was not possible to use accommodation available to the fullest extent. Unfortunately, lack of staff still makes it impossible to use the ward of 20 beds, a state of affairs existing in many hospitals to-day. The number of nurses able to offer regular part-time help seems, however, to be smaller here than in some parts of the country.

The Committee learned with great regret of the death of Dr. J. Braithwaite, a Life Governor of the Hospital and for many years a member of the Medical Staff.

For some years the Committee have been anxious to provide Mr. Pilcher with some help with the tremendous amount of work for which he is responsible and they were pleased to have the opportunity through the Ministry of Health to appoint jointly with the Holland County Council an additional Surgeon. Mr. Charles Maclay, F.R.C.S., was appointed in April, from a good field of candidates, and has rendered considerable assistance with the major surgery in the district.

Dr. J. E. Walker, the well-liked Honorary Radiotherapist, resigned on leaving his appointment at Scunthorpe to join the Staff of the Glasgow Royal Infirmary. Mr. S. P. Redmond, M.B., B.Ch., D.O.M.S., has been appointed Honorary Assistant Ophthalmic Surgeon, to deputize for Mr. Briggs when necessary. The Dermatological Department, which has now been functioning for one year under Dr. E. Ritter, has been appreciated by the medical practitioners and patients.

After consultation with the Medical Committee some appointments to the Honorary Medical Staff have been re-designated so as more accurately to describe the duties of the members of the Honorary Medical Staff.

The Committee have pleasure in again recording their gratitude to the Medical Staff for the services rendered to the hospital and patients and for lectures to the Nursing Staff. During the year a request was received that honoraria be paid to the Medical Staff. The Committee gave long and very careful consideration to this matter involving as it did a departure from the established practice of the Hospital. The principal of payments to the Medical Staff had been however steadily adopted by hospitals in this area, and the Committee therefore decided to adopt the principle, having secured the approval of the Ministry of Health, as from 1st July, 1947.

The pre-nursing scheme for the employment of girls interested in nursing between leaving school and entering the Training School has been working successfully throughout the year. The services of the girls are welcomed in the Departments in which they are employed and they should benefit considerably from the further general education provided with the co-operation of the Education Authority and by the lectures of the Sister Tutor.

The Central Preliminary School for Nurses has been established at Lincoln for four Lincolnshire Hospitals, of which Boston is one, and all Student Nurses spend the first nine weeks of their training there.

The General Nursing Council have expressed their approval of a plan for a complete Training School for Nurses at Boston, based on this Hospital, but this cannot function until certain requirements of the General Nursing Council are met by the other Hospitals. In the meantime our affiliation to Lincoln County Hospital and Grimsby Hospital continues and the Committee records with pleasure that one of our students, Nurse Parrish, won the Lincoln Hospital Gold Medal as the best nurse of the year. It has been possible to engage an Assistant Cook for night work to ensure that the staff on night duty shall have adequate meals properly served away from the wards.

Following a visit of inspection by a Catering Officer of the Ministry of Health, a letter was received expressing the Minister's appreciation of the keen interest taken in the diet of the patients and staff and of the high standard of the general catering arrangements.

Despite the return to the General Fund Account of £3,000, which it had been hoped to use for extensions at a later date, the total income of £22,980 was not sufficient to meet expenditure which reached £28,533 leaving a deficit of £5,553 13s. 7d. No one item in the accounts is responsible for a large part of this difference and details of expenditure are set out in the accounts at the end of this report.

A legacy of £500 bequeathed by the late Mrs. L. Brooks, to endow a bed has been received. Mrs. A. Bramley, bequeathed £100 for the work of the Hospital. The Committee are deeply grateful for this help.

The internal painting and re-decoration of the Hospital property has been continued and almost completed during the year and various new items have been purchased at the request of the Medical Staff, including a modern surgical diathermy apparatus.

A new lift to the Rysdale Ward and an incinerator has been added, and the necessary licence has been obtained to add a small but urgently needed extension to the present operating theatre.

In 1912 a Ladies' Hospital Association was founded for the purpose of collecting subscriptions, and regularly since that date members of the Association have collected something over £100 annually for the Hospital. For many years Mrs. G. E. MacTaggart, as President, and Mrs. G. A. Day as Honorary Secretary have been responsible for the organisation of the Association's activities and the Committee deeply appreciate their work and the very valuable services of the collectors, many of whom have been responsible for a district for a very long time. Unfortunately, this year it was not possible to arrange for district collections but most of the subscribers on the collectors' books have responded generously to a direct appeal for a continuation of their support.

The Boston and District Benefit Society and other Hospital Associations by the loyal support and hard work of their officers and collectors have maintained their contributions towards the cost of members treated.

The invaluable support of the Ladies' Linen Guild continues and particular thanks are due to the small group of members who attend regularly to do the mending.

The V.A.D. detachment of the British Red Cross Society help us whenever they can and again members of the St. John's Ambulance Society have formed a rota to help with special patients.

Once more a great variety of very welcome gifts in kind received during the year have been augmented by generous food parcels from overseas and in particular from Australia and South Africa. Again we were fortunate to receive over 10,000 eggs, mainly collected by the members of the Women's Institutes supported by outstanding collections from certain Schools and Sunday Schools. The generous gifts of vegetables received from the various merchants in the area are greatly appreciated and considerably assist in the maintenance of the high standard of catering.

With regard to the National Health Service which comes into force on 5th July, 1948, the Committee have little more information to add to that given in last year's report. The Regional Boards have been formed and the Sheffield Board in which region this Hospital is situated will shortly announce the areas allotted to the Hospital Management Committees, and will proceed to form these Committees from persons in the area.

The Committee have given serious consideration to the position of certain members of the Staff with a record of long and loyal service to this Hospital and, in some cases, other Hospitals. Accepting guidance from a memorandum issued by the British Hospitals Association and the Ministry of Health, and in view of the transfer of ownership on 5th July, 1948, they have recorded in the minutes so far as possible their intention to recognise this service by pension had there been no change of ownership.

The Hospital will continue to serve the people of Boston and district after the appointed day as it has done for generations and the Committee wish to stress again that the interest of the people of Boston and district in their Hospital is just as necessary and valuable.

B. HAINES, Secretary.
